## SKILLS & TECHNICAL TOOLS

---

**Programming Languages:** JavaScript, Java, C#, SQL, Python, C/C++

**Skills and Technologies:** MS SQL Server, SQLite, HTML/CSS, Node.js/Express.js, Pandas, Git, Scrum, DataDog, Unity

**Languages:** English, Spanish (Fluent)

## EXPERIENCE

---

### Support Engineer | OpenAsset

*Jul 2025 - Present*

- Developed Python scripts leveraging Pandas to execute mass data manipulation, user management, and high-volume data imports/exports for enterprise clients
- Programmed dynamic, automated document templates within Adobe InDesign, Microsoft Word, and PowerPoint by developing advanced scripts with custom JavaScript libraries
- Owned and resolved complex technical support tickets, translating intricate system bugs into clear, actionable solutions for AEC clients
- Investigated complex server, network, and infrastructure issues, utilizing DataDog logs to isolate system errors and pinpoint codebase defects

### Software Engineer I | Bryco, LLC

*Mar 2024 - Jul 2025*

- Developed and maintained React web applications using Outsystems under a Scrum framework, focusing on delivering high-performance, secure, and user-friendly SaaS solutions
- Wrote and improved SQL queries for complex database structures in MS SQL Server, optimizing for speed and scalability
- Integrated third-party systems and APIs, including REST APIs, with Outsystems applications to enable seamless data exchange communicating with ERP technologies like Infor M3

### IT Supervisor | Rutgers University Office Information & Technology, New Brunswick

*Aug 2021 - Sep 2023*

- Troubleshoot advanced technical and network issues, trained IT consultants, and assisted consultants with escalated tickets
- Developed a query-based tracking tool to audit service tickets that has since been adopted as a standard to ensure all work met minimum certification standards for technical support

## PROJECTS

---

### meleeTrack | Node.js/Express.js/SQLite/HTML/CSS

- Created a full-stack web app that allows users to search Smash Bros. Melee competitors and generate a unique graphic of the player and a description based on their stats
- Developed frontend with HTML/CSS/JavaScript, and developed backend with Node.js as the server using a SQLite database with Express.js as the framework to communicate with the frontend

### Capstone Agricultural Drone | Arduino IDE

- Assembled a quadcopter frame including motor wiring, control board integration, and power distribution
- Configured and calibrated sensor modules (fire detection, soil moisture) and pesticide dispensers with precise equipment sizing and cabling, then programmed modules with Arduino IDE

## EDUCATION

---

### Rutgers University, School of Engineering | New Brunswick, NJ

*Graduated May 2023*

*B.S. - Electrical and Computer Engineering*

*GPA: 3.51 (Magna Cum Laude)*

## CERTIFICATIONS

---

- **Front-end Developer Specialization** | Outsystems *Oct 2024*
- **Associate Reactive Developer Certification** | Outsystems *Jun 2024*
- **Associate Developer Certification** | Outsystems *May 2024*
